December 2018

Dear KIDS COUNT Reader,

For over two decades, South Dakota KIDS COUNT has worked to improve the lives of South Dakota's children, youth and families through research and collaboration. It is our hope that with the right resources, support and access to opportunity, all of our children can reach their full potential.

The 2018 South Dakota KIDS COUNT Factbook offers up-to-date data on child well-being in South Dakota, providing a comprehensive and in-depth look at the status of South Dakota's children. This book serves as a tool and a resource for policymakers, journalists, advocates, and other stakeholders to ensure kids' needs are taken into account when decisions are being made that impact them.

All of us have a role to play in ensuring that our children have what they need to be successful. As a state, it should be our goal to enact smart public policies and invest wisely in programs so that each and every child grows up to lead a happy, healthy and productive life. We hope that you enjoy the 2018 South Dakota KIDS COUNT Factbook!

Sincerely

# STATE OF SOUTH DAKOTA

## DENNIS DAUGAARD, GOVERNOR

December 2018

My Fellow South Dakotans,

It's my pleasure to address you in the 2018 South Dakota KIDS COUNT Factbook. The data provided by KIDS COUNT is an invaluable source illustrating the health and wellbeing of South Dakota's kids over time and helps guide policymakers, program providers, advocates, and funders in directing resources to areas where we can continue to make a positive impact.

Supporting children in our state has been important to me as Governor. It is evident that public policies supporting children's development and access to opportunities help ensure all children thrive. We must recognize the needs of every member of our diverse communities and promote a prosperous future for South Dakota through continued investments that aid children, families and communities.

The best thing we can do to invest in our state's future is to invest in South Dakota's children. We must continue to work together to ensure that every child is provided the opportunity to succeed for their futures.

Sincerely

Dennis Daugaard

STATE CAPITOL • 500 EAST CAPITOL • PIERRE, SOUTH DAKOTA 57501-5070 • 605.773.3212

# Welcome

## South Dakota KIDS COUNT

### Mission

South Dakota KIDS COUNT supports the decision-makers, advocates and the public to act towards the best interest of all of South Dakota's children.

### Vision

South Dakota KIDS COUNT project will be the primary source for program and policy decisions to ensure all children in South Dakota have the resources they need to be healthy, educated and safe.

### Values

- Quality, credible data are necessary to make responsible decisions about policy and resource allocation.
- All South Dakota children, regardless of race or ethnicity, deserve equal access to opportunity. Racial and ethnic outcome disparities are reduced or eliminated.
- The best outcomes for South Dakota's children are achieved when multiple organizations and groups work together as partners.

## Some Cautions for Using the Data

Small numbers - Much of the data in the Factbook is calculated based on small numbers of events i.e. child death rate, infant mortality rate. As the population base becomes smaller, as it does in many South Dakota counties, the number or percent may vary considerably from year to year.

Understand the indicator - Rates are not reported for counties when the number of events are too small to be meaningful. Some indicators are reported in numbers, some as percents and some as rates (rate per 1,000 or rate per 100,000). Read the data sources and definitions found at the beginning of each section. How to Perform Data Calculations is found on page 9.

Time period - Data are based on different time intervals (e.g., state fiscal year, five-year averages). The reader is cautioned to check each indicator. Again, check definitions and data sources to determine the exact time period being reported.

## Accessing KIDS COUNT Data

Each indicator section and county page can be accessed in portable document format (PDF) on the South Dakota KIDS COUNT website [www.sdkidscount.org](http://www.sdkidscount.org)

The Kids Count Data Center provides easy access to state, county and regional data for indicators in the SD KIDS COUNT Factbook and other indicators not published in the Factbook. The KIDS COUNT Data Center allows users to do more than just view the data. Users can also:

- Create a customized profile of data for a selected county or region
- Generate customized maps for presentations and publications that show how children are faring in a community
- Embed automatically updated maps and graphs in other websites or blogs

Instructions on how to use the data center:

<http://www.usd.edu/business/south-dakota-kids-count/tool-box>

**DataCenter.KidsCount.org/SD**

Hundreds of child well-being indicators at your fingertips to support smart decision making and good policies for children and families.

# How to Interpret Health Data

Information and limitations of the health data:

Mortality and death rates are calculated by taking the number of deaths in any given category, dividing it by the total number of individuals in that category and multiplying by 1,000 or 100,000 (whichever number is chosen).

$$\frac{\text{Total death}}{\text{Population Base}} \times 1,000$$

A percentage is calculated using the same formula only multiplied by 100.

As the population base becomes smaller, as it does in many counties in South Dakota, statistical variation becomes more prominent and more prone to anomalies. For example, let's say a county has 2 infants die out of 85 live births. If we divide 2 by 85 and multiply by 1,000 we get an infant mortality rate of 24 per 1,000. If the next year only 1 infant dies out of 85 live births, the infant mortality rate would be 12. The so-called large decrease is a result of statistical variation and the magnitude of the drop is exaggerated because of the use of a base of 1,000.

$$\frac{\text{Infant deaths}}{\text{Population Base}} \times 1,000 = \frac{2}{85} \times 1,000 = 0.0235 \times 1,000 = 24 \text{ per } 1,000$$

In an attempt to minimize chance variations, five-year averages are used. Despite these precautions, in the most sparsely populated counties, using 5 year averages still will not reduce chance variation significantly for some of the indicators due to the small number of events. A rate or percent is not calculated for those counties where the event number is below 3.

The standard error (SE) of a rate is used in health statistics when studying or comparing rates. The SE defines a rate's variability and can be used to calculate a confidence interval (CI) to determine the actual variance of a rate 95% of the time. Rates for two different populations are considered significantly different when their confidence intervals do not overlap.

The Sully County percent of prenatal care during the first trimester was 49.4% for 2013-17. The 95% confidence interval [CI] is 15.12%. This was based on 41 first trimester care out of 83 total live births in the county. Sully County's percent of births to single teens is significantly different than the South Dakota rate. This is because the confidence intervals for Sully County (34.3% to 64.5%) do not overlap the state's (71.7% to 73.1%). In other words, Sully County's prenatal care during the first trimester falls outside of the state's confidence interval and the percentages are lower than the state's, making Sully County's rate worse than the state's average.

The 95% confidence interval [CI] for Fall River County is 9.36%. The percent of prenatal care during the first trimester was 68.2%. Fall River county had 204 out of 299 first trimester care for 2013-17. Fall River County's rate is not significantly different from South Dakota because the prenatal care during the first trimester for Fall River County (58.9% to 77.6%) overlap the state's (71.7% to 73.1%). In other words, Fall River County's prenatal care during the first trimester falls within the state's confidence interval making Fall River County's rate the same as the state's average.

The 95% confidence interval [CI] for Yankton County was 4.86%. The percent of prenatal care during the first trimester for Yankton County (based on 1,168 first trimester care during 2013-17 out of 1,377 total live births) is significantly different from South Dakota because prenatal care during the first trimester for Yankton County (80.0% to 89.7%) do not overlap the state (71.7% to 73.1%). In other words, Yankton County's prenatal care during the first trimester does not fall within the state's confidence interval and the percentages are higher than the state's, making Yankton County's rate better than the state's average.

# How to Perform Data Calculations

There are numerous computations in this report that involve rates, percentage and percent change over time. Many of these calculations are similar. The one that is used depends on what one wants to say about the data. Basically, each of these calculations involves dividing one piece of data by another.

## Percentage

A 'percentage' means one part in one hundred. Ten percent means 10 out of 100. To calculate a percent, divide the number in a subgroup (or smaller number) by the number in the total group and multiply by 100.

Example: Percent=(number in subgroup / number in whole group) (number of low birthweight babies in South Dakota, 2017 [841]) / (number of all live births in South Dakota [12,127] ) x 100.

$$841 / 12,127 = 0.069 \times 100 = 6.9\%$$

About 7% of live births in South Dakota in 2017 were born low birthweight (weight under 5.5 pounds or 2,500 grams).

## Rate

A rate is simply the number of things per some other number, usually 100, 1,000 or other multiples of 10. A percentage is a rate - per 100. Depending on the size of the subgroup, a rate greater than 100 is often used. This is the case in health statistics such as infant mortality, child death, etc. To calculate a rate you need three pieces of information:

- (1) the total group number,
- (2) the number in the sub group
- (3) the 'per' number—per 1,000, 10,000, or 100,000. The per number is your multiplier.

Example: Rate=(number in sub-group / number in whole group) x multiplier (number of teen deaths in South Dakota, 2017 [32] / number of children ages 15-19 in South Dakota [56,675]) x multiplier.

$$32 / 56,675 = 0.000564 \times 100,000 = 56.46 \text{ or rounded to } 56.5$$

The teen death rate for South Dakota in 2017 was 56.5 per 100,000 teens ages 15-19.

Rates can also be obtained per month or per day. For 2017 the figures for live births would show:

$$12,127 \text{ births} / 12 \text{ months} = 1,011 \text{ live births per month in South Dakota}$$

$$12,127 \text{ births} / 365 \text{ days} = 33 \text{ live births per day in South Dakota}$$

## Percent Change

Change from one time period to the next can be calculated. This is called the 'percent change'. It is calculated in the following manner: (newer year number - older year number) / older year number x 100

Example:

2010 population under age 20 in South Dakota = 226,740 (newer number)

2000 population under age 20 in South Dakota = 234,385 (older number)

$$(226,740 - 234,385) = -7,645$$

$$-7,645 / 234,385 = -.00326 \times 100 = -3.26\% \text{ or rounded to } 3.3\%$$

This figure indicates that between the years of 2000 and 2010, the number of children under age 20 decreased by about 3%.

# Demographics

# Low Birth Weight Babies (less than 5.5 pounds)

Low Birthweight - less than 2,500 grams (about 5.5 pounds)  
 County comparisons to South Dakota (2013-17)  
 South Dakota rate = 6.5%  
 (4,005 low weight births)

**Counties compared to South Dakota average confidence interval**

- Low number of events (LNE) or no events
- Rate significantly better than South Dakota average
- Rate not significantly different than South Dakota average
- Rate significantly worse than South Dakota average

# Women Receiving Prenatal Care (1st trimester)

Prenatal Care (during first trimester)  
 County comparisons to South Dakota (2013-17)  
 South Dakota rate = 72.4% of single teens under age 20  
 (43,627 births to single teens)

Counties compared to South Dakota average confidence interval

- Rate significantly better than South Dakota average
- Rate not significantly different than South Dakota average
- Rate significantly worse than South Dakota average

## Economic

### Medicaid Participation 2018

Ages 0-5	28,303
Ages 6-13	35,463
Ages 14-18	16,249

### SNAP Participation 2018

Ages 0-4	13,330
Ages 5-13	21,478
Ages 14-17	6,320

- **2017 Per-capita Income: \$29,611**
  - ~Per-capita income is the mean income computed for every man, woman, and child in the state.
  - ~Example: Total income for Clay County divided by the total population of Clay County equals per-capita income.
- **2017 Median Household Income: \$56,521**
  - ~ The median divides the income distribution into two equal parts, one having incomes above the median and the other having incomes below the median.

# Safety

The data include a list of charges referred to the teen court programs across the state by offense, the number of cases heard and the number of cases completed or returned. Note: a defendant may have had more than one charge so the number of charges referred does not equate to the number of cases heard if the defendant handled more than one charge in a case. The number of returned and heard cases do not reflect cases that were in progress (heard but not completed) in a year so there is a discrepancy in the number of cases and dispositions. A returned case in a case that either did not complete, the defendant chose to quit the program, or the state's attorney asked for the case back.

# Safety

In 2017, pedestrians under age 20 account for 30% (37 of 123) of injuries in traffic crashes.

In 2017, bicyclists under age 20 comprised 41% of all injuries in traffic crashes.

In 2017, motorcycle drivers under the age of 20 were involved in 14 crashes.

## Child Abuse and Neglect State Fiscal Year 2018

Type of abuse or neglect:

Physical Abuse: 116 children  
 Sexual Abuse: 45 children  
 Physical Neglect: 1,760 children  
 Emotional Maltreatment: 28 children

2,141 families completed an Initial Family Assessment that included 4,213 children  
 1,763 children identified for safety responses:  
 517 remained in their homes in need of services  
 1,246 removed from the home by law enforcement or a court

## Demographic Indicators

Data Source: 2017 population estimates: Population Estimates for April 1, 2010 and July 1, 2017. Total and one-dimensional demographic summaries (Hispanic, race, age and sex) by county. Missouri Census Data Center: <http://mcdc.missouri.edu>

## Economic Indicators

### TANF/SNAP/Medicaid

Internet sites: <http://dss.sd.gov/tanf/>  
<http://dss.sd.gov/snap/index.asp>  
<http://dss.sd.gov/medicalservices/>

Data Source: TANF/SNAP/Medicaid participation are from the South Dakota Department of Social Services. The years are for state fiscal years (July 1 - June 30). Data of five or fewer cases are not shown to avoid disclosure of information for particular individuals.

The Supplemental Nutrition Assistance Program (SNAP, formerly known as food stamps) benefits are provided to supplement the shopping recipient's food budget. The amount of benefits a household receives is based on its size, income and allowable expenses.

### Child Care

Internet site: <http://dss.sd.gov/childcare/>

Data Source: Child Care Services Assistance Program, Department of Social Services.

### Types of Regulated Child Care:

**Family Child Care Home - Registered:** South Dakota law defines a Family Child Care Home as one in which care is given on a regular basis for any part of a 24 hour day to 12 or less children from more than one unrelated family. This includes any children under the age of six who are living in the home. Family child care is a service provided in the provider's home.

Family child care providers are registered rather than licensed. Registration is a voluntary process where the applicants declare their intent to provide family child care and agree to comply with standards that have been established by the Department of Social Services. A

registration certificate is in effect for two years. Registration is legally mandated when a provider receives compensation from public funds. Providers who are not receiving reimbursement from public funds and caring for 12 or fewer children are exempt from registration. A registered family child care provider must be at least 18 years old.

**Group Family Child Care Home - Licensed:** South Dakota law defines a Group Family Child Care Home as a facility providing child care for a part of a day as a supplement to regular parental care for 13 to 20 children from more than one family, including the provider's own children who are under the age of six years. A group family child care home may be located in the provider's own home or in a separate facility. Group family child care homes are mandated by law to be licensed regardless of funding source.

**Child Care Center - Licensed:** South Dakota law defines a Child Care Center as a facility which provides child care for part of a 24-hour period to 21 or more children from one or more unrelated families, including the provider's own children under the age of six years, regardless of the source of income. A child care center may be located in the provider's own home or in a separate facility. Child care centers are mandated by law to be licensed regardless of funding source. A child care center may be operated as a nonprofit organization or as an independent, proprietary facility.

**Before & After School Care Center:** Provides care and supervision before and after school hours for children who are five years of age or older and enrolled in school. Before & After School Care Center providers serve only school-age children and may be providing care for either part of a day or full-time during school breaks. These centers are required to become licensed regardless of the funding source or location of the program. Centers are inspected each year. The exemption to this requirement is if the after school program is providing educational or recreational activities for children who come and go at their own discretion.

### Funding Categories Available for Child Care Assistance:

**TANF Child Care:** Provides payment of child care expenses for TANF families in approved work activities, which includes community service. Families must be receiving cash TANF benefits. No co-payment is required.

**Non-TANF Assistance:** Available for low-income families

who work or work and attend school. Families may earn up to 175% of the federal poverty level and still be eligible. Families must be working or in school a minimum of 80 hours per month or if attending a college, university or technical institute a minimum of 15 semester credit hours is required. No minimum hours are required for high school or GED students. Co-payment is based on family size and adjusted gross family income.

**Transitional Child Care (TCC):** Provides 12 months of child care payments for families whose TANF case closes because of income. May earn up to 175% of the federal poverty level and still be eligible. Co-payment is based on family size and adjusted gross household income.

The Division of Child Care (CCS) at the South Dakota Department of Social Services has a number of responsibilities that include funding, training and technical assistance for registered and licensed child care providers; child care facility development in response to local community needs. In addition, CCS provides direct child care assistance payments for qualifying families; a statewide training delivery system for child care providers; and the licensing and registration of child care programs as authorized by SDCL 26-6.

**Licensing of Child Care Programs:** Individuals or corporations who provide child care for more than 12 children are required by South Dakota law to be licensed. South Dakota Codified Law 26-6-9 requires licensure (regulation) of all child welfare agencies (including child care centers, group family child care homes and before-after-school programs) by the Department of Social Services. South Dakota Codified Law 26-6-16 authorized the Department to develop standards of child care to be used for the regulation of these agencies. Child care licensing is a means of reducing the risk of harm to children in child care settings by establishing and enforcing regulations that require maintenance of minimum standards. Licensing is a form of consumer protection. Without licensing to achieve compliance with states regulations children would be at higher risk from fire, unsafe buildings and play equipment, injury, disease, and developmental impairment. In addition to prevention efforts, licensing workers also offer consultation to providers to help them increase quality of care beyond the minimum standards.

#### Direct Child Care Assistance:

South Dakota families with incomes below 175% of the Federal Poverty Level (FPL), families receiving TANF benefits and those transitioning off TANF may apply for financial assistance to help pay their child care costs. Eligibility for the program is based on household size and gross monthly income. A sliding fee scale is used to determine the amount of reimbursement and co-payments for each family. Families receiving child care assistance generally choose a provider who is licensed or registered (regulated) by the state. If a family chooses a provider who is unregulated by the state, certain criteria must be met, such as TB testing, screening for child abuse and neglect and basic training. Unregulated providers can be a close relative, a family friend, or someone who provides care in the home of the family requesting assistance. Unregulated providers are limited in the number of children they may care for and the amount of reimbursement they can receive. All providers must be 18 years old.

#### Training and Education-Early Childhood Enrichment (ECE):

This program was established in 1998, to meet the growing need for early childhood and out-of-school-time (OST) training and to assist CCS in efforts to recruit and retain quality child care providers across South Dakota. Five ECE sites are located throughout the state to offer a variety of accessible services that support child care providers, teachers, parents and others involved in the care and education of children. ECE programs offer provide ongoing training, education, technical assistance and coaching opportunities to help licensed or registered child care providers meet mandated training requirements and to improve overall program quality. Registered family child care homes are required to obtain six hours of training each year; licensed group child care facilities are required to obtain 10 hours of training each year; licensed child care centers are required to obtain 20 hours of training each year. By offering this unique blend of direct services and expertise, the ECE system helps to ensure children receive quality care in an enriched learning environment.

### **Safety Indicators**

#### Youth Offense Referrals

Internet site: <http://ujjs.sd.gov/>

Data Source: Court Services Department of the South Dakota Unified Judicial System.

Definitions: The figures represent the number of youth under 18 years of age who are referred to the Unified Judicial System (UJS) by the states attorneys. Numbers are for the county in which apprehension took place and represent the number of cases rather than individuals. In other words, if a child was referred to UJS for several different offenses, he or she would be counted several different times. Juvenile informational complaints may be filed with the states attorney by law enforcement officials, parents, court services officers (alleged probation violations) and others. The states attorney may decide to file a formal petition, refer the case to a court services department for a 90-day informal adjustment, refer the case to a private agency approved by the court, or take no action.

#### Commitments to Department of Corrections

Internet site: <http://ujjs.sd.gov/>

Data Source: Court Services Department of the South Dakota Unified Judicial System.

Definition: The total number of juveniles committed to the Department of Corrections during the reporting period. The figure includes youth who have had multiple petitions committing them to the Department of Corrections with separate dispositional dates during the reporting period. Figures are by county, which means the county of record in which the judge conducted the adjudication and dispositional proceedings. It can be county of residence or the county where the offense occurred.

#### Teen Court Data

Data Source: South Dakota Teen Court Association.

Definitions: The data include a list of charges referred to the teen court programs across the state by offense, the number of cases heard and the number of cases completed or returned. Note: a defendant may have had

more than one charge so the number of charges referred does not equate to the number of cases heard if the defendant handled more than one charge in a case. Also, the number of returned and heard cases do not reflect cases that were in progress (heard but not completed) in a year so there is a discrepancy in the number of cases and dispositions. A returned case in a case that either did not complete, the defendant chose to quit the program, or the state's attorney asked for the case back.

#### Youth Related Traffic Crashes

Internet site:

[http://dps.sd.gov/enforcement/accident\\_records/Annual\\_Crash\\_Reports.aspx](http://dps.sd.gov/enforcement/accident_records/Annual_Crash_Reports.aspx)

Data Source: 2017 South Dakota Motor Vehicle Traffic Crash Summary. Department of Public Safety, Accident Records Office.

Child Abuse & Neglect

Internet site: <http://dss.sd.gov/cps/>

Data Source: Department of Social Services, Child Protection Services.

Child Protection Services is a division of the South Dakota Department of Social Services which:

- 1) Completes safety assessments of children who are reported as abused and neglected;
- 2) Assures provision of services to the children and families when safety of the children is a concern;
- 3) Provides reunification services to children and families when out-of-home placements of the children are necessary; and
- 4) Provides services to develop permanent placements for children in out-of-home placement when efforts to return the children to their family are not successful.

Child Protection Services responds to reports of suspected child abuse or neglect involving a parent, guardian or custodian through a process referred to as an Initial Family Assessment. An Initial Family Assessment is a neutral approach to gathering information and a thorough family centered evaluation of child maltreatment and family functioning. Upon the completion of the Initial Family Assessment, Child Protection Services must determine whether abuse or neglect has occurred and whether the child is safe or unsafe in the home due to the existence of threats to child safety. Threats to child safety may exist in a family

situation even if abuse and neglect has not yet occurred.

When threats to child safety require court ordered out-of-home placement, the first goal considered is reunification of the child with the parents. Child Protection Services provides services to improve the ability of the parent to safely care for their child. Child Protection Services has responsibility for developing a permanent placement if the court determines the parents are not able to make the changes necessary to safely provide for their child making reunification with the parents no longer an option. Those permanent placement options are adoption, guardianship with a relative or non-relative family or other permanent living arrangement.

#### Admission to Drug or Alcohol Treatment Programs

Internet site:  
<http://dss.sd.gov/behavioralhealth/>

Data Source: The South Dakota Department of Social Services, Behavioral Health Services.

Definition: Admissions include youth under 18 years of age who received state accredited alcohol and drug services ranging from crisis intervention to structured treatment programs. The person is counted once for every program in which the client participated. However, if a person was admitted to the same program more than once, he or she is only counted once. Admissions include both residential and outpatient treatment programs. Admission totals may include juveniles who are counted more than once if they received services at different programs. The reason for this is because the system does not track clients by a common identifier but by facility. Although the possibility of a client being counted more than once exists, it is probably uncommon.

## Health Indicators

Internet site: <http://doh.sd.gov/>

Data Source: South Dakota Department of Health.

### Data Indicators & Definitions:

A dash [-] indicates there were no events. An asterisk [\*] indicates there were less than three events and no rate/percent was calculated.

- Infant mortality (rate): The number of deaths of infants under one year of age per 1,000 live births.
- Low birth weight babies (percent): Low birth weight babies are those born weighing less than 2,500 grams (about five and one half pounds).
- Child death (rate): The number of deaths for children ages 1-14 per 100,000, from all causes.
- Teen violent death (rate): The number of deaths from homicides, suicides, and accidents to teens ages 15-19 years per 100,000 teens.
- Births to single teens (percent): The percent of all live births to single females under the age of 20.
- Women receiving prenatal care (percent): The number of live single births to women receiving prenatal care during the first trimester (first three months) of pregnancy, by county of residence.

## Education Indicators

Internet site:

<http://www.doe.sd.gov/ofm/statdigest.aspx>

### Enrollments and dropouts

Data Source: South Dakota Department of Education. Statistics for dropout rates are for grades seven through 12 and enrollment are for pre-kindergarten through grade 12.

Definitions: Dropout rate: The rate is calculated by dividing the number of dropouts grades 7-12 divided by the grade 7-12 enrollment, based on fall enrollment census count. The SD-DOE calculates the dropout rate in this manner to conform with Federal guidelines. A "NA" indicates "not applicable".

Enrollment: Total number of students enrolled in school on the last Friday of school in September.

### Child Count

Definition: Child Count data on disabilities are for individuals age three through 21. This information is obtained from the Special Education Child Count done every December to determine age, placement alternatives, and disabling conditions for children with special needs. The number presented represents the number of children with disabling conditions in the designated school district. These conditions include: deaf, blind, seriously emotionally disturbed, mental retardation, hearing and visual impairments, specific learning disabilities, multiple disabilities, orthopedic impairments, speech/language impairments, other health impairments, autism and traumatic brain injury. Child Count data does not include data from private or BIA schools but does include Chapter I state operated/state supported programs.

### Free and Reduced Price School Lunches

Internet site <http://www.doe.sd.gov/cans/nslp.aspx>

Data Source: Child and Adult Nutrition Services, Department of Education. Data for the SD Department of Human Services and SD Department of Corrections are included as inmates and clients who are under age 21 can participate in the program.

Definitions: "DNP" = Did Not Participate in the School Lunch Program. A double asterisk (\*\*) means the agency has 90% or more of the children eligible for free or reduced price meals or have 10 or fewer children enrolled. In accordance with 7CFR 245 6(f), the percentages are not listed because to do so would overtly identify the children directly or by deduction. Contact Child and Adult Nutrition Services at 605-773-3413 if there are any questions.

University of South Dakota  
[www.usd.edu](http://www.usd.edu)

Founded in 1862 and the first university in the Dakotas, the University of South Dakota is the only public liberal arts university in the state, with 205 undergraduate and 73 graduate programs in the College of Arts & Sciences, School of Education, School of Law, Sanford School of Medicine, School of Health Sciences, Beacom School of Business and College of Fine Arts. With an enrollment of nearly 10,000 students and more than 400 faculty, USD has a 17:1 student/faculty ratio, and it ranks among the best in academics and affordability. USD's 18 athletic programs compete at the NCAA Division I level.

[www.aecf.org](http://www.aecf.org)

The Annie E. Casey Foundation creates a brighter future for the nation's children by developing solutions to strengthen families, build paths to economic opportunity and transform struggling communities into safer and healthier places to live, work and grow.

KIDS COUNT® is a registered trademark of the Annie E. Casey Foundation.

Beacom School of Business  
[www.usd.edu/business](http://www.usd.edu/business)

USD's Beacom School of Business was established in 1927 and has been accredited by the Association to Advance Collegiate Schools of Business (AACSB) since 1949. The leading business school in the region, Beacom's programs are consistently ranked among the top business schools in the nation by Princeton Review, U.S. News & World Report and others for its high-quality learning experience, student success, affordability, and high-caliber of faculty and students. Whether a student chooses face-to-face or online courses, Beacom's programs emphasize real-world experience through professional organizations, quality internships and capstone projects.
